EDUCATION

Graduating in MAY 2019
AKGEC, GHAZIABAD

Joined AKGEC as a poor lad unable to get admission in IITs despite of securing a rank, but soon started to realise my caliber. Started working with SOFTWARE INCUBATOR along with my graduation in INFORMATION TECHNOLOGY. Got trained in DATA STRUCTURES, ALGORITHM, OPERATING SYSTEM, COMPUTER NETWORKS and DBMS. Maintained an appreciable percentage of 75.13%.

2013 - 2014 Senior Sec. Schooling
St. ANTHONY'S SR. SEC. SCHOOL

Studied as a Science Student securing a good percentage of 83.8% under CBSE

2011 - 2012 High School
St. ANTHONY'S SR. SEC. SCHOOL

First milestone of life was achieved securing a good percentage of 95% and Merit Certificate for Brilliant Performance under CBSE

The resume summarises my work into huge time being given to JAVASCRIPT, PHP and PYTHON. My present project are Voice Bio metric Authentication System and Road Accidents Analysis using Data Analysis, Big Data and Machine Learning. I am a hard working person who dedicates his time to being best version of himself. I belive in perfection so whatever I do, I put my compelete heart and soul into it. I have worked on so many technologies since switching between technologies has never been any problem for me. I am a mould can be carved given the potter is agood teacher. I am looking for just one opportunity to showcase my talent.

WORK EXPERIENCE

2018/03 - 2018/07   Full Stack Intern at RMgX

Worked as Full Stack Intern at RMgX. Technologies I worked on were Laravel, & Angular. Worked on Project KARYA (Property Management System) as an Angular & Laravel Developer. Project involved use of :

- Webpack, Elixir, Mix & Jhipster
- Software Development Cycle(SDLC)
- Angular 5, Laravel 5
- Laravel Passport & JWT
- Representational State Transfer(REST)
- Testing Laravel In PHP Unit
- Testing Angular In Karma & Jasmine

2018/06 - 2018/07   Summer Trainee at Reliance Industries

The internship was to develop a software to be used by Reliance Industries Limited that can calculate the weight of goods on the loaded vehicles. An application that can be used for recording daily entry of raw materials and exit of processed good. The project was called RAW MATERIAL ENTRY SYSTEM made in:

- Pip, Python, Django
- Django-Rest
- Testing Python in UNITTEST
- Angular 5

WORK EXPERIENCE

2017/10 - 2018/01   Remote intern at HumGenie Private Limited.

Worked as a PHP & Javascript Developer. The MVC framework being used was Codeigniter.
The projects I worked on are mentioned as follows:
a. Embedded WhatsApp Messenger
b. HumGenie Examination Portal
Projects were basically made on
- Codeigniter & PHP
- JAVASCRIPT & Jquery
- Testing javascript in CHAI & MOCHA
- Bootstrap & CSS
- CKEditor
- JWT

2016/10 - present   FULL STACK DEVELOPER at Software Incubator, SDC, AKGEC

This is a part time Software Development Cell at AJAY KUMAR GARG ENGINEERING COLLEGE. I have been working here for almost 3 years along with my graduation and have been part of successful project being offered by College. Software Incubator trained me for getting market ready before entering the market place. Every trainee at software incubator tastes the Industry Experience before getting into it.
- Started as a PHP developer.
- Worked mostly on Javascript & associated frameworks.
- Worked as Laravel Developer.
- Switched the Techstack to Javascript after excelling in PHP.
- Again Switched the Techstack to python & Django.
- Worked on Angular, Vue, React, PUG, Express.
- Learnt REST APIs
- And it's uncountable....!!!

Projects

08/2018 - 08/2018 Google Calendar Sync

It was a simple project assignment given by CONRATI made on VUEJS. It's major aim was to sync Google calendar into client application to manage hourly events.
Technologies Used

- VUE

08/2018 - 08/2018 YouTube Trends

This project is based on YOUTUBE API V3 & built over PUGJS & ExpressJS. It brings together trending videos of all the countries present on you tube. Just select your country and the trending video will appear.
Technologies Used

- Express
- PUGJS
- YouTube API V3

06/2018 - 07/2018 Raw Material Entry

The project was being developed under Reliance Industry Limited that can be used to calculate the weight of raw materials enting into the factory. The project was developed on Python & Django-REST.
Technologies Used

- Angular 5
- Django & Python

03/2018 - 07/2018 Karya Property Management

It is a property management tool being developed by RMgx. It consists of all the utilities required for online property dealing. It was first biggest project of RMgX & Expedian Inc and I worked as a Laravel & Angular Developer. This project was is being maintained over a private gitlab repository.
Technologies Used

- Angular 5
- Laravel 5.*
- Karma
- Jasmine
- PHPUNIT
- Amazon EC2

10/2017 - 01/2018 HumGenie Examination Portal

It was a simple examination portal for HumGenie Clients for easily conducting and hosting online tests.
Technologies Used

- JAVASCRIPT & Jquery
- CodeIgniter
- Css & Bootstrap
- CKEditor

Projects

10/2017 - 01/2018   Embedded WhatsApp Messenger

This project was to send message to "Whatsapp" directly through web under the messaging module of the project on which company worked.

Technologies Used
- Javascript & Jquery
- CodeIgniter
- Css & Bootstrap
- WhatsMate API

09/2017 - 10/2017   The Github Resume

The Project brings along all your work experience from Github Repositories and generate a resume.

Technologies Used
- Angular 5
- Laravel 5.*
- REST
- Passport
- Github Developer API
- Css & Boostrap

02/2017 - 03/2017   Blood Donation Camp

It was website developed for managing blood donation camp at the college.

Technologies Used
- JAVASCRIPT & JQuery
- PHP
- CSS & Bootstrap

11/2016 - 01/2017   Online Mp3 Music Player

Project was being developed to play Songs online from the servers provided By SDC. Users can search, play, download a song if registered, create Playlists if registered and much more.

- Technologies Used
- Javascript & JQuery
- PHP
- CSS & Bootstrap

10/2016 - 11/2016   Budget Management System

A Budget Management System That Keeps Track of Money Spent By User And Gets Warned when it reaches Limit.

Technologies Used
Javascript & JQuery
PHP
CSS & Bootstrap

09/2016 - 10/2016   One Punch Man

Multiplayer combat game made in Javascript.

Technologies Used
- Javascript
